Immediate saving on electricity bill with in the first month of connection

Hassle-free Benefit

WHAUP Solar team takes complete care of the solar system operation to make sure that electricity is smoothly delivered to you at lower cost for 20 years.

*Conditions as mutually agreed under power purchase agreement

WHAUP

WHA Utilities and Power PLC. (WHAUP) is the largest industrial utilities provider and specializes in fully integrated utilities and energy services for industrial customers.

WHAUP's power business portfolio consists of a generating capacity of 508 Megawatts (equity) of power plants in operation, and additional capacity 34 Megawatts (equity) under construction, making a total generating capacity of 542 Megawatts (equity) by 2019.

For renewable energy, WHAUP has installed and operated solar power system on rooftops of WHA Group's warehouses and factories, and has been gearing forward on this environmentally friendly platform to all industrial customers. With our extensive experience, WHAUP offers an all-in service package, with ZERO investment and maintenance cost, allowing customers to enjoy lower electricity cost while also helping to reduce world's CO₂ level.
